

introducing the new generation of locking implants

PAX
ADVANCED LOCKING SYSTEM

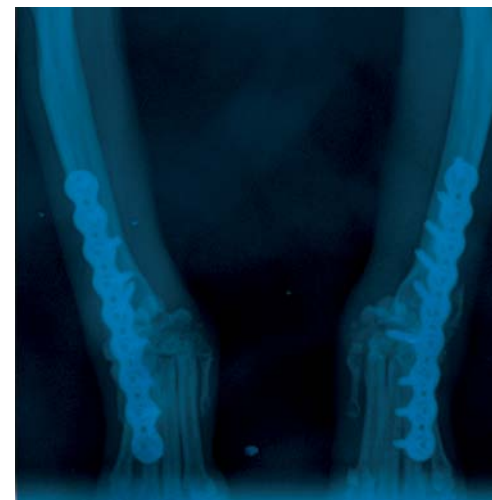

- Highest grade Titanium implants
- Polyaxial screw locking system
- Repeated polyaxial locking is possible
- Surgeon decides locking angle, not the manufacturer
- Unique compressional properties
- Star drive screws
- 2.0 - 2.4 mm sets available
- 2.7 - 3.5 mm sets available
- Comparable stiffness to equivalent stainless steel implants

Look for the next generation of SECUROS's crimping device coming in October! Check it out at ACSV Symposium 2010.
